HARNESSES

Your Globally local source for quality, custom-built WIRE HARNESSSES at a competitive price.

- Automated cutting, stripping and termination equipment
- Soldering and splicing
- Design and development assistance
- Quick turn prototyping and sampling

Our wire products and state-of-the-art manufacturing facility meet and /or exceed the following industry standards:

- UL/CSA
- WHMA - IPCA620
- ISO9001:2008

Our state-of-the-art programmable CIRRISS testers automatically verify continuity and isolation without fail to assure you receive a reliable, accurate, consistent product every time.

Two Artos Series 5 MTX multi-task wire processors are just a few of the many automated capabilities at Electri-Cord.

Engineering and Design Assistance

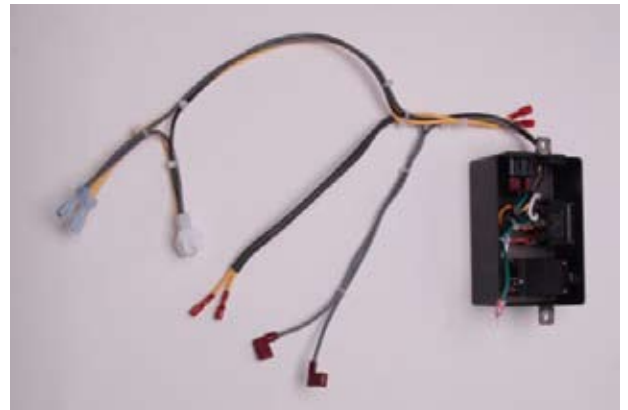

Let our fully staffed engineering design department help you with your next project. Our goal is to lend our expertise to your product early to ensure manufacturability and suggest material substitutions to help lower overall costs. This offering along with our U.S., Mexico, and China facilities ensure we can support your needs from prototype and production through end of life.

Registered to ISO 9001:2008 • SBA • ITAR registered.

Unique situations, specialized applications and industry specific challenges have been solved by our in-house engineering department for over 60 years. Our clients have utilized our experience and vast knowledge to find the most efficient and cost effective answers to cord, connector and related product questions.
