MEDICAL

Your globally local source for high-performance hospital-grade cords, cables, power sources, surge suppression products and plugs.

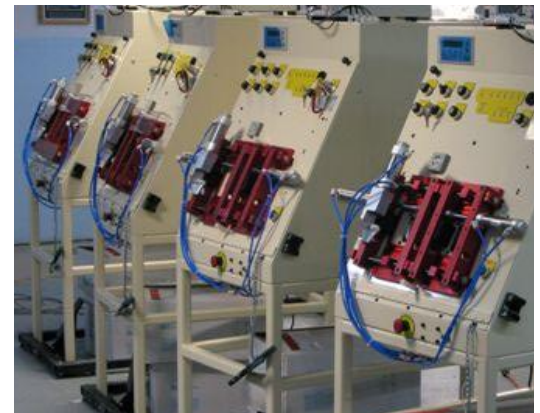

- Custom builds
- Premium molds
- Various stocking programs
- Leader in hospital grade products on the market

Hospital grade cell at the factory in PA.

Power cords and harnesses used in medical grade equipment.

Electri-Cord's line of Cord Test machines are used by cord set manufacturers throughout the globe to ensure that every cord is electrically tested for HiPot, Continuity and Polarity. If any of the three tests result in a failure the cord is automatically cut to ensure it does not leave the factory.
