TO: All ECM Power Supply Cord Customers

SUBJECT: Marking Requirement Change for UL Listed Power Supply Cords

We are writing to let you know that you will see a new marking on the cords that we supply to you. This letter is a proactive approach and official notification of this change. As part of UL's enhanced Mark Integrity Program and to differentiate UL Certified power supply cords from other certifiers, UL is requiring the manufacture of the cord to mold in "UL" in a circle on the face (or other surface) of the attachment plug. This will help identify that the complete power cord is UL certified.

This marking requirement will go into effect on July 1, 2015. Power supply cords manufactured prior to July 1, 2015, are exempt from this requirement and are in full compliance with UL with or without the marking. This change will in no way affect the form, fit or function of the cord. It is in addition to, not in lieu of, the use of the Holographic labels as both are needed as evidence of UL coverage. Please feel free to contact us if you have any questions regarding this change.

Regards,

A handwritten signature in black ink that reads "Julie Thompson".
